INTRODUCTION

Among the different fields where blockchain technologies have been used thus far, social good projects are one of those where blockchain is thought to have a significant impact. Existing social good solutions mostly focus on collecting and distributing money for charity, followed by programs aimed at improving environmental quality and projects targeted at optimizing energy usage and distribution.

Despite the recent buzz in the cryptocurrency industry, the blockchain technology that underpins it is still in its infancy and far from widespread use.

Blockchain technology is the driving force behind the growth and success of cryptocurrencies. This current technology is based on the decentralization idea. It improves security, privacy, and safety. The key attribute of decentralization, it decreases corporate risk and provides transparency. This technique addresses the issue of potential security or confidentiality threats to a user.

Authorities all across the world are gradually accepting blockchain, and more and more legislation is supporting it. All of these elements point to cryptocurrency having a bright, credible, and widespread future. Moon Rocket Coin is also going to operate through this technology.

ABOUT

WHO WE ARE

Moon Rocket Coin is a decentralized token created on the Binance chain to maximize returns to investors. With a team of crypto experts leading the cause, MRC strives to be the next revolution in the realm of blockchain. Our creators have studied the markets for a long time, uncovering what it takes to launch a resilient coin with promising potential.

WHY CHOOSE US

Moon Rocket Coin differentiates itself from the rest through integrity, strategy, research, and transparency. Rest assured, MRC is the kind of decentralized project you shouldn't be worried about. With loads in our arsenal of specialties, we anticipate seamless benefits to our customers on a range of different levels. Safe to say, MRC is based on a wholly customer-oriented system with impressive tokenomics with a clear pathway to investor satisfaction.

OUR MISSION

To create an irreplaceable position in the market as an emerging coin with limitless financial rewards and benefits, all the while doing our part for the community.

OUR VISION

To be recognized as a coin with unbelievable potential and benefits for investors. We strive to serve our community through innovative ways, compelling rewards, and most importantly, amazing returns on investment. However, that's just the tip of the iceberg. The Moon Rocket Coin App is built to extend maximum advantages to our customers through affordable rates on investment, hassle-free staking, and storing of cryptocurrency safely and securely.

WHAT WE DO

MRC brings a new world of opportunities to investors who seek bigger returns. Our project is based on a firm belief in financial resilience that cannot be toppled by whales. By recognizing common flaws in most crypto tokens, we have created a complete system to back MRC up with unwavering support. Not just that but our integrated App also assumes an unparalleled position among others. Although a new player to the scene, Moon Rocket Coin is an investor's safe haven. From swapping between various cryptocurrencies, multi-chain wallets, staking, transferring and receiving tokens to everything in the middle, it enables limitless opportunities for you to seize.

CHARITY FOCUS

HOMELESSNESS

Homelessness is a financial issue. People who do not have a place to live are heavy users of public resources and cost the community money rather than bringing it in. Domestic violence is rampant, and the majority of homeless persons have experienced physical or sexual abuse at some point in their lives.

Moon Rocket Coin will consider partnering with various homeless charity organizations to assist in resettling families in homes and assisting people who have been on the street for a long time - as well as working with people who are homeless as a result of drug abuse - Moon Rocket Coin will donate funds to help rehab organizations restore lives!

Homelessness has a variety of factors that are both simple and complex. Homelessness can be driven by family disintegration, mental illness, sexual assault, addiction, financial trouble, gambling, or social isolation, as well as by poverty, unemployment, or a lack of affordable accommodation.

We want to store so much value in Cryptocurrency that every homeless family and individual can now find a place to live.

CHARITY FOCUS

HOMELESSNESS

There are currently 1.6 billion people who do not have access to safe housing. We are excited about using technology to accelerate impact since an issue of this magnitude necessitates new solutions.

We continue with a detailed description of the overall architecture of the proposed system to achieve these objectives, as well as lessons learned in the process of bringing this system to life in the real world.

We can provide a safe tracking of funds all the way through by employing a blockchain, and our future programming is designed to provide more automatic means of fund distribution to needed locations.

We give our charity partners a master node to deliver a regular flow of revenue to their organizations while also giving them first-hand experience with cryptocurrency.

Binance Smart Chain

Binance Smart Chain (BSC) was created to allow users to use security-based smart contracts at a much faster and more productive rate than other chains.

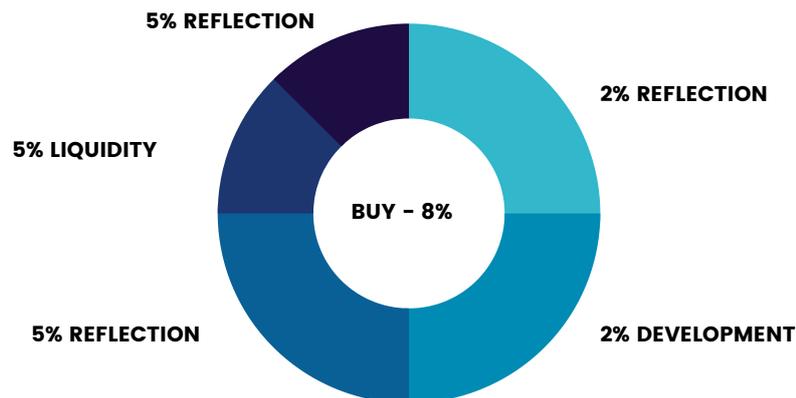

Decentralized trading on BSC delivers lightning-fast trades and very cheap costs, making it one of the most extensively utilized blockchains for Decentralized Finance (Defi). BSC uses a symbolic protocol established by the BinanceTeam called BEP-20. Binance Smart Chain (BSC) is a newer blockchain standard that has gained popularity due to its low gas prices and lightning-fast transaction rates. Moon Rocket Coin is a Binance Smart Chain-based Bep20 cryptocurrency.

HOW DOES OUR SYSTEM WORK?

FEES AND BUYBACK BURNING

BUY - 8%

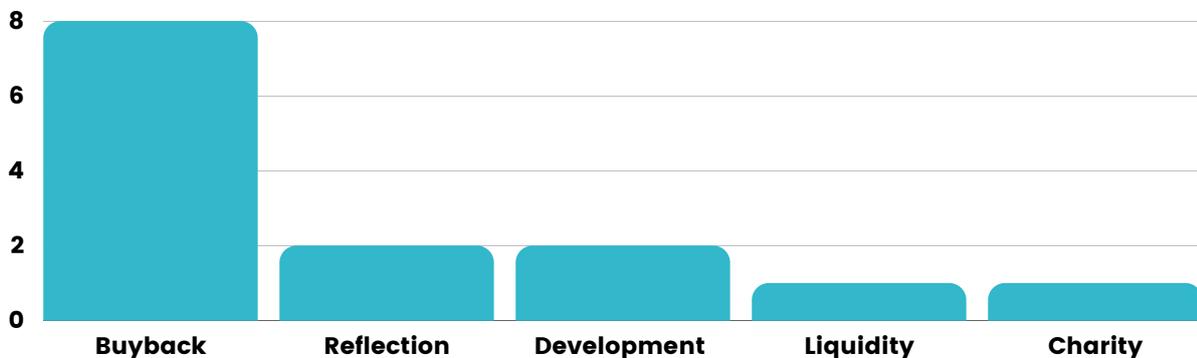

- 2% Reflection - will be redistributed to holders on every buy
- 2% Development - will be collected for the advancement of the project. A portion of this will be used for marketing.
- 2% Buyback - will be implemented manually to bring stability to the market.
- 1% Liquidity - will be added to the pool automatically
- 1% Charity - will be donated to help with homelessness and help with drugs and alcohol abuse

HOW DOES OUR SYSTEM WORK?

SELL TAX - 14%

- 8% Buyback - 70% of MRC bought will be burnt once the manual Buyback has been implemented. 20% will be held in the development wallet for the advancement of the project, and a portion of this will be used as liquidity for listing on new exchanges. 5% will be sent to the Charity wallet for donations. 5% of the coin bought will be used as a reward system for the community.
- 2% Reflection - will be redistributed to holders when there is a sell
- 8% Buyback - will be used to buyback and burn
- 2% Development - will be collected for the advancement of the project and a portion of this will be used for marketing
- 1% Liquidity - will be added to the pool automatically
- 1% Charity - will be donated to help with homelessness and help with drugs and alcohol abuse

The total sell tax will be 14 which will be used to reward holders, encourage currency value stability, and offer exposure through our marketing wallet. In addition to the existing tax, we have other measures to remove the paper hands from dumping. We have implemented an anti-whale function explained below:

- The maximum amount of MRC you can buy in a single transaction is 100,000 MRC.
- Maximum sell limit of 0.01% of total circulating MRC supply; any transaction over this will fail.
- Transfers of more than 0.01% will fail, meaning you won't be able to send tokens to another wallet over this amount.

BENEFITS TO USERS

1

We have an integrated blacklist function that restricts non-human purchases. Once a bot is detected, our system rejects any transactions attempted and fully bans them from the platform.

2

Bagging a reward today can make for an amazing future tomorrow. Participate in our regular competitions and get the chance to win daily airdrops. The airdrops are reserved at 7% of our total supply!

3

With a generous retributions of reflection, holders will be able to earn passively while holding onto their bags. Holders will get a 2% redistribution on every transaction made.

4

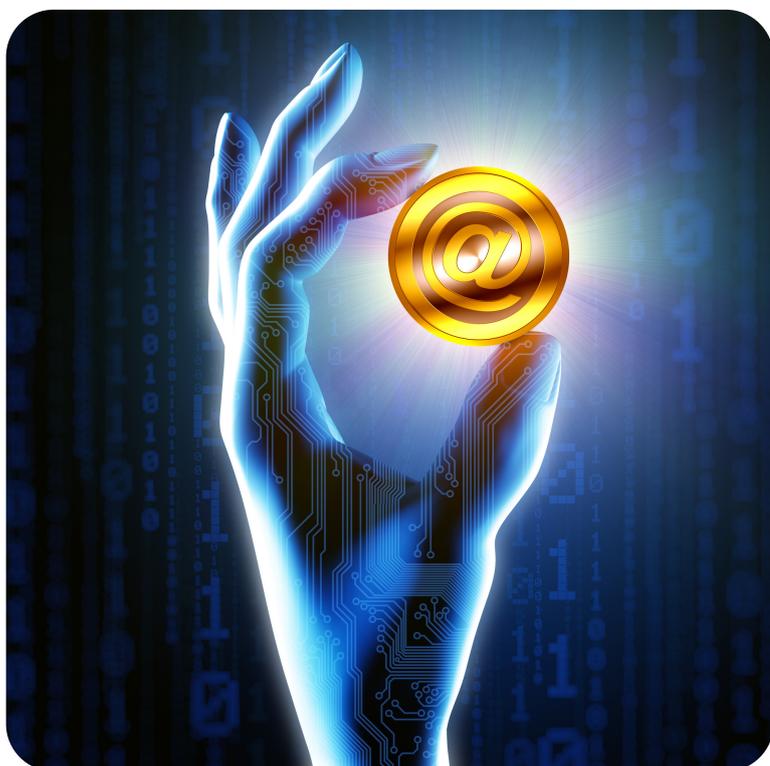

Holders of MRC will be able to stake and earn passive income. Staking will be possible from version two of the Moon Rocket Coin App.

** Investors can stake their coin to gain exponential benefits. please note that this will be made possible through the version two of the Moon Rocket Coin App.*

STAKING

BENEFITS OF STAKING

- Earn easy interest on your cryptocurrency assets.
- More Smoothing is better than crypto mining.
- Increases the blockchain's efficiency.
- There is no need for mining equipment.

Staking digital currency is a process that involves submitting your crypto assets to assist a blockchain in organizing and verifying transactions.

It's possible with digital currencies that use the proof-of-stake paradigm for payment processing. In comparison to the proof of work model, which necessitates mining devices with registration ability to deal with numerical situations, this is a more energy-efficient solution.

Staking is an excellent way to make quick money with your crypto, especially since certain cryptographic forms of money charge excessive lending costs for marking.

MRC will be implementing staking in version two of their App. This will draw more users to our coin, hence increasing the value of MRC. As a long term holder of MRC, you will benefit massively by holding and eventually staking our coin.

App and its functionality

- Multiple Cryptocurrencies available
- Get your wallet balance
- DApp
- Order booker
- Indicators fully customizable
- Multiple wallets
- Coins history data from 1 minute to 2 years analysis
- News and Social updates
- Live market with market balancing
- Calculator (Cryptocurrency)
- Add notifications easy by double-clicking on the chart
- Fully responsive (Mobile, Tablet) and advanced optimization feature
- Send and receive features
- Biometric
- Academy

FEATURES

Restrictions

We have implemented a blacklist function to stop Bots from buying

Max all time buys per wallet - 121,000 (once wallet reaches a max all-time buy of 121,000, they have to use another wallet if they want to buy more tokens)

Max sell per transaction 0.01% of total circulation rejected if exceeded.

Reflection and Burn

Holders of MRC will receive 2% reflection when there's a buy and 2% reflection when there's a sell.

Buyback, Development, Charity wallets will not receive redistribution of tokens on each transaction as this function has been stopped for these wallets.

When the Buyback function is implemented tokens that are purchased with the Buyback funds 70% of these tokens will be burnt, this will be used to reduce the total supply of the MRC tokens from the market.

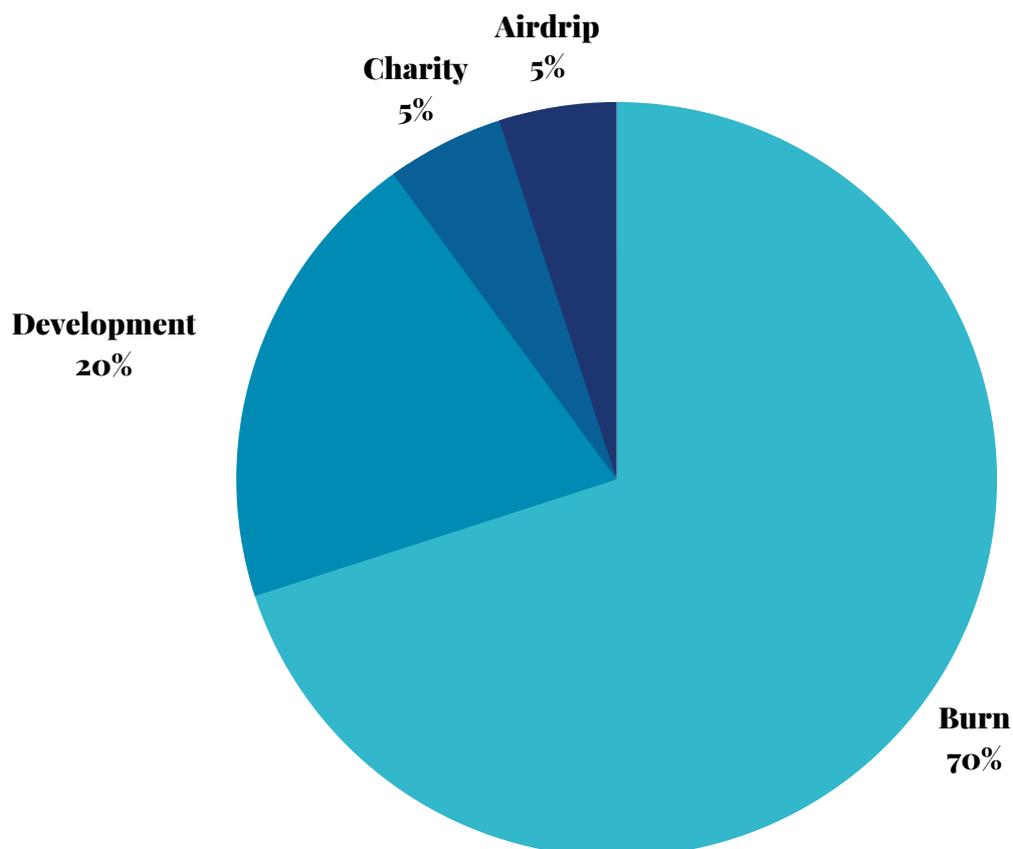

When the total circulation supply reaches 22 million; there will be no burning of MRC tokens. All burning will cease permanently and, we will stop the Redistribution of the MRC tokens as rewards to holders.

FEATURES

Buyback

Manual Buyback - 8% taxes from sales will be collected and stored in the buyback wallet once the team decides to implement the buyback, tokens (Moon Rocket Coin) will be bought. Below is the breakdown of how the tokens will be dispensed:

- 70% will be burnt,
- 20% will be transferred to the development wallet, this will be used for collecting needed funds for new exchange listings. Our goal for the first year is to get listed on as many exchanges as possible, by implementing the above we aim to achieve this goal.
- 5% will be sent to Charity wallet needed donations to support homelessness
- 5% will be sent to the Airdrop wallet for community competitions

Our Commitment to Customers

Our commitment to our consumers is based on building trust and providing security. We all know that security and compliance are critical to achieving objectives. We conducted a comprehensive security evaluation that includes external penetration testing, threat modelling, and risk control assessments, among other things.

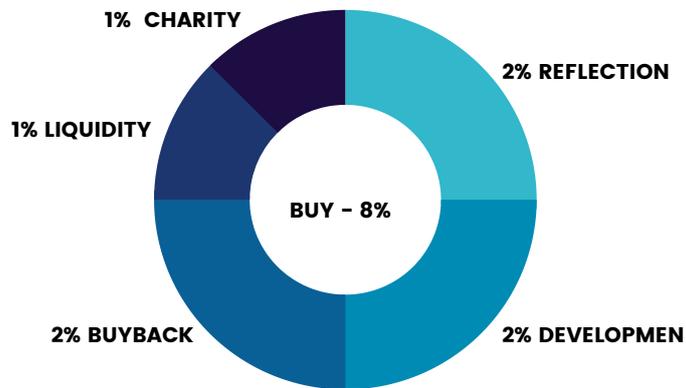

Airdrop competition

- Airdrop competition will be done several times in the year, time, and date to be announced to the community.
- Max 250 MRC (airdrop) daily earnings per wallet entries
- Max 1750 MRC (airdrop) week earnings per wallet entries
- Max 7000 MRC (airdrop) month earnings per wallet entries
- Airdrop will be given to the first 1000 entries per competition; however, to receive these rewards they must complete all mandatory tasks given by the MRC Airdrop bot in Telegram.
- Max 500 coin per referral

TAXES

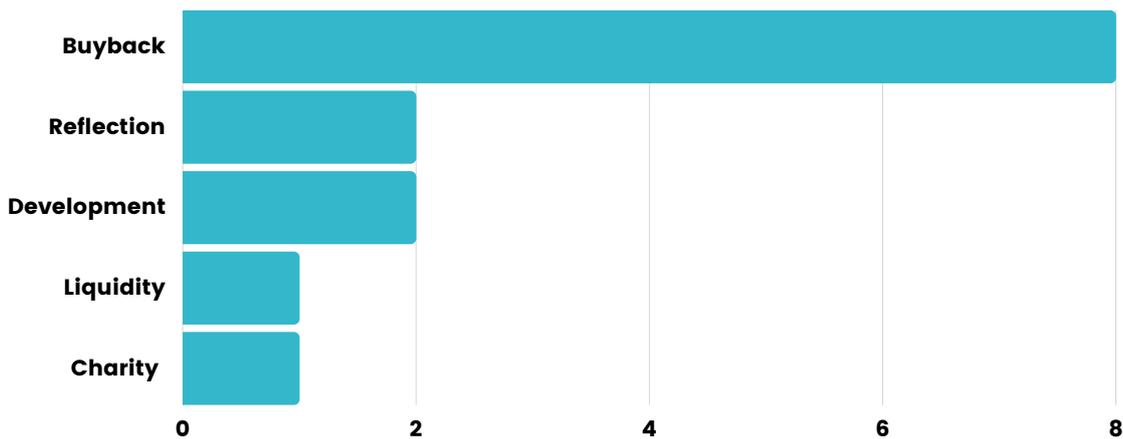

BUY - 8%

- 2% Reflection
- 2% Development
- 2% Buyback
- 1% liquidity
- 1% Charity

SELL TAX - 14%

- 8% Buyback
- 2% Reflection
- 2% Development
- 1% liquidity
- 1% Charity

TOKENOMICS

TOKEN INFORMATION

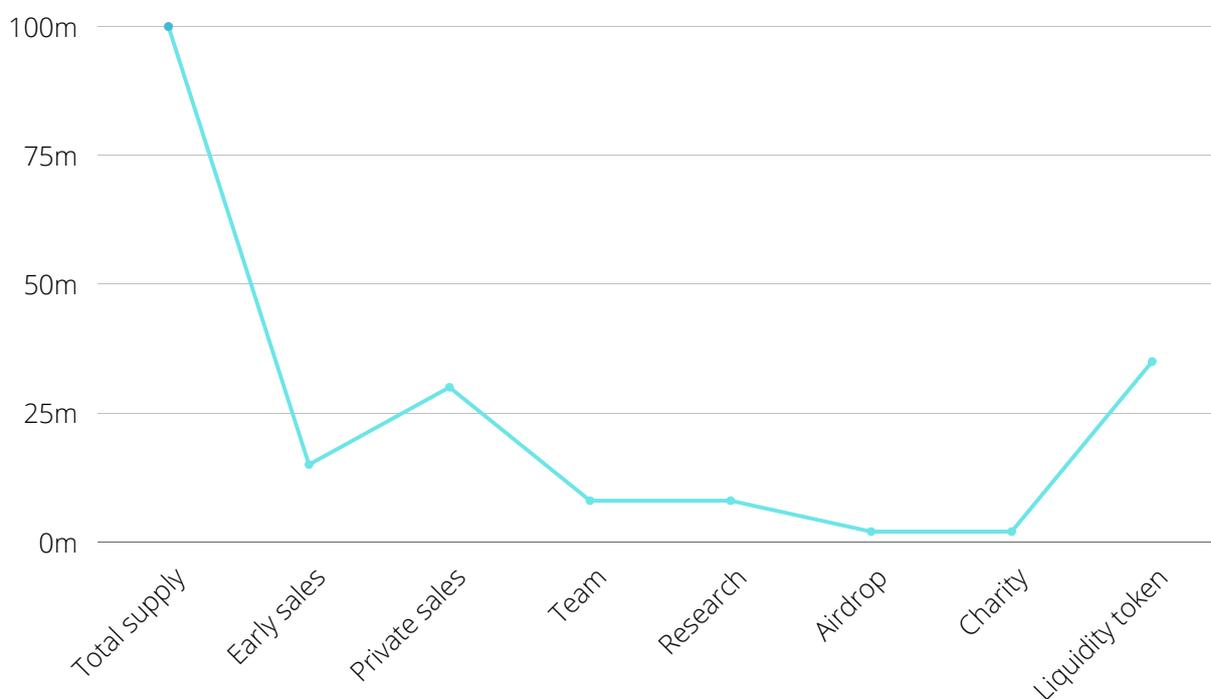

- Chain: Binance Smart Chain (BEP20)
- Token Name: Moon Rocket Coin
- Token Symbol: MRC

DISTRIBUTION OF SUPPLY

- Total supply 100 million
- Early sales 15% -15m
- Private sales 30% 30m
- Team 8% - 8m
- Research/development - 8% 8m
- Airdrop - 7% - 7m
- Charity - 2% - 2m
- Liquidity token - 30% - 30m

LAUNCH

- We will do an Early Sale and Private Sale on our Website before a public launch on Pancake Swap. However, our sum target for both sales is 1000 BNB. In unforeseen circumstances, where the target is not met we will carry out a Pink Sale.
- Early sales 15% of total circulating supply - 15 Million MRC plus a 10% bonus added on each Early Sale purchase.
- Private sales 30% total circulating supply - 30 Million MRC plus a 5% bonus added on each Private Sale purchase.
- Token price - \$0.012
- Max buy - 120,000

Road Map

1

Phase 1

- Open our official Telegram group
- Launch Website
- Start marketing campaign
- Start Airdrop/Giveaway Campaign
- Start Early Sale
- Get Audited
- Begin Private Sale
- Pink Sale
- Launch on Pancake Swap
- List on Coingecko and CMC
- Marketing towards the purpose of building our Telegram, Twitter, Instagram community
- Donate toward homelessness, drug and alcoholic abuse

2

Phase 2

- Launch wallet App (here holders can buy, sell and store their tokens safely. In V2 of the App, users will be able to stake their MRC tokens and earn rewards on each stake period.
- Major marketing campaigns Achieve 10,000 plus holders and CoinMarketCap listing. Apply for a new exchange listing.
- Get listed on one of the top five exchanges, and achieve 20,000.
- Start a major marketing campaign to achieve 50,000 holders.

LAUNCH TAXES

There will be a high sell tax of 40% for the first 72 hours of launch, after this time the 40% sell tax will be reduced to the normal sell tax of 14%. This will reduce the level of dumps in the market. By implementing the 72 hours high tax period, will give enough time for the Buyback wallet to generate a significant amount of BNB execute the Buyback function.
