INTRODUCTION

Moon Rocket Cash is a decentralized token created on the BSC Network. MRCH is the second utility token developed by the Moon Rocket Coin Team. MRCH primarily focus on the NFT space and rewarding holders of the Moon Rocket Coin ecosystem. MRCH will be the governing currency used on the Moon Rocket Coin NFT marketplace. MRCH will enable users to buy and sell NFT directly from the Moon Rocket Coin platform which will, in turn, add value to the MRC token.

Directly from the Moon Rocket Coin platform collectors and creators will trade NFTs with one another. Authentication can be done easily by looking at the blockchain, and royalties are automatically distributed by our smart contracts. This means there are no barriers to entry, no galleries and authenticators taking a cut of creators' profits, and that creator will be able to secure royalties from every sale throughout the life of the work. If you care about supporting artists and creators, buy their NFTs. So MRCH will enable this! We will reward our buyers by giving them a small percentage of royalties, access to events, raffles, and additional free content in the future.

NFT MARKETPLACE

The NFT market is a decentralized marketplace for buying, selling, and exchanging non-fungible tokens that represent a variety of items. The assets held in the NFT marketplace can also be auctioned, traded, minted and lots more. Moon Rocket Coin will offer its users the space to express their creativity and also to earn on their work.

Binance is the largest cryptocurrency and token exchange on the planet. They've also created their platform where individuals can trade NFTs for digital assets. Another example is Crypto.com who is a big player in the NFT space. However, notwithstanding, Moon Rocket Coin has a unique advantage and that is we are the underdogs being an underdog is great because we have a huge potential to continue to grow as the NFT market continues to expand. This is seen in the overall NFT sales in the first quarter of 2021 exceeding \$2 billion, according to sources.

NFT INTEGRATION TO MOON ROCKET COIN

NFT for artists are customizable cases that may be utilized as the transaction's core unit in a variety of areas. In the field of art, the NFT combines a diverse set of art-related components with a high level of adaptability. The NFT Marketplace for Artists is a dedicated platform for artists to display their work in exchange for a greater exchange rate. If you care about supporting artists and creators, buy their NFTs through our platform.

The NFT Marketplace for Art brings artists from all around the world together under one roof to fulfil their visions. The artists create a community on the site where content creators may debate design techniques as well as current high-quality content. Moon Rocket Coin intends to create an NFT marketplace with the possibility in the future to use our NFT to enter into the metaverse.

The major purpose of the NFT marketplace for art was to bring together artistic and crypto expertise through a unified organization known as NFT. As is the case with Moon Rocket Coin, which was designed to use technology to inspire the next generation of artists.

Contract Functionality

Moon Rocket Cash will implement an anti-bot measure to ensure that bots do not buy in or sell out, as a result we will ensure a cool-down timer in place to limit unusual purchases made by the same wallet over a short period. Within the contract there will be a functionality that will enable the user to either be included or excluded from reward, this functionality is mainly targeted at exchanges.

- There will be a wallet limit is to control the supply and demand, of MRCH, and to ensure an anti-dump is in place.
- The manual buyback and burn feature will also be on to remove the circulating coins and increase the value of the remaining Moon Rocket coins. MRCH will also implement a 2% auto burn on each transaction.
